GP-6RC®

State of the Art! \$4,995.⁹⁵

Snell SA2005
Certified

An absolute state of the art example of technology engineered into a functional piece of safety equipment, that would be as comfortable in an art gallery as it is at the race track.

The GP-6RC utilizes a proprietary Carbon Fiber weave that provides both expected carbon fiber properties of high strength and light weight, but also provides never before found flexibility!

It is that flexibility that allows Arai to produce this breathtaking helmet to the standards that Arai has set for themselves, before they meet standards set by others.

Cheek pads are replaceable with optional sizes for customized fitting.

This extremely strong, flexible and light weight shell works in concert with Arai's exclusive 1-piece multi-density interior EPS liner, providing Arai's legendary fit and excellent impact energy management in an incredibly compact package.

The GP-6RC is nothing less than groundbreaking.

Key features of the new GP-6RC®

- Larger, closeable intake vents combined with larger 10mm hole greatly increases air intake.
- Larger 10mm rear vent hole increases airflow even further.

- New shield pivot hardware, with redesigned track slider that improves aerodynamics.
- New wider 6 series shield, with wider eye port, for increased peripheral field of view.
- Shield, pivot hardware and wider eye port were developed on the RC and will be the basis for all future 6 series models.

- Positive shield lock mechanism provides solid shield latching, while allowing normal operation of the shield.
- Designed to be an integral component of the shield system and function, not just an add-on afterthought.
- The simplicity of the function masks the complexity of the design.

- Newly integrated seats for HANS® posts, providing a flat surface for the anchor to sit flush around its entire perimeter.
- Factory installed HANS® Posts, with Arai logos.

- Proprietary Carbon Fiber material and weave provide an extremely strong, yet flexible material, which helps impact energy management.
- Multiple reinforcing materials are used to improve performance and keep weight and size to a minimum.

- Standard accessory kit with each GP-6RC:
- Clear A/F installed on helmet; 1 A/F Tint Shield; 1 Dual Pane “Extreme Conditions” A/F Tint Shield; Spare shield pivot/screw kit (with shell washers); Spare clear upper vent kit (3-front, 2-rear) and 2 packs of factory tear-offs; Set of 3 Arai decals.
